My neighbour has found his ideal vehicle by searching on used car mart for "[used BMW Maidstone](#)". He has recently opted out of his company car and was considering a used Audi, something of similar size and specification to the BMW 5 Series. The main influencing factor was monthly finance repayments and only having a small 10% deposit. After driving past Big Motoring World in Kent, he popped in to browse their selection of used BMW and was really impressed with the cost of a second hand 525d saloon. Their Business Manager managed to get a really affordable monthly repayment on a personal contract purchase.
